

Safari Lounge Menu Intelligence Audit

Prepared by: Menu Intel Lab

Product: White-Label Menu Audit SaaS

Account mode: white_label

Commercial lens: resellable intelligence, exportable briefs, and API-backed decision support

Copyright boundary: Commercial metadata, scores, and original derivative concepts only. No full copyrighted recipe instructions.

Executive Diagnosis

This audit does not provide recipes. It identifies commercial dish structures that can reduce uncertainty, expose menu leaks, reveal hidden winners, and create new revenue paths through catering, ghost kitchen execution, scarcity drops, or Safari Lounge-style IP.

Subscription Packaging

Audit Sections

- **Menu Leaks:** High labour, high waste, low cross-utilisation, poor holding, or weak delivery signals.
- **Hidden Winners:** High deployability, batch suitability, cross-utilisation, catering fit, and scarcity/drop fit.
- **Catering Conversion:** Rows that can become office trays, family bundles, or high-ticket group orders.
- **Ghost Kitchen Conversion:** Rows that hold/reheat/deliver well with strong familiarity.
- **Scarcity Calendar:** Rows that support preorder allocation and weekly demand rituals.

Ranked Client Opportunities

Client-Facing Close

The fastest revenue path is to select 5-10 hidden winners, convert them into a focused menu/catering/drop plan, and review performance monthly. The ongoing value is recurring decision support, not one-time recipe delivery.

Top Records

Title	Category	Model	Score
Black Pepper Beef (Steak Kow)	Hot Main	49	4
